Nama: Aditia Surya Putra

Keas: Flutter D

1. Membuat tittle My Flutter App

```
Widget build(BuildContext context) {
    return MaterialApp(
    | title: 'My Flutter A',
    | theme: ThemeData(primarySwatch: □Colors.deepPurple),
    | //membuat appbar dengan tittle MaterialAPP
    | home: const MyHomePage(title: 'My Flutter App'),
    ); // MaterialApp
}
```

2. Membuat list

```
//Membuat list yang berisi data yang di gunakan di listView
List<String> values = [
   "Learn Flutter",
   "Learn ReactJS",
   "Learn VueJS",
   "Learn Taildwind CSS",
   "Learn UI/UX",
   "Learn Figma",
   "Learn Digital Marketing",
];
```

3. Membuat App bar dengan center tittle dan icon

```
-appBar: AppBar(
  backgroundColor: ☐ Color(0xFF6200EE),
  centerTitle: true,
 -title: Text(widget.title),
  actions: <Widget>[
   —IconButton(
    Licon: const Icon(
        Icons.search,
        color: ■Colors.white70,
      ), // Icon
      onPressed: () {
      // do something
      },
    ) // IconButton
  ], // <Widget>[]
), // AppBar
```

4. Membuat Listview builder
